

**RVLGroup**

# Specialist Aviation Services based in the heart of the UK

## **Specialist Aviation Services**

RVL Group is a specialist aviation services provider based at East Midlands Airport, operating and maintaining its own fleet of nearly 20 aircraft, including the Cessna 310, 402, 404 and F406.

Under its EASA AOC, Type A Operating Licence and Dangerous Goods Approval, RVL Group provides services to a wide range of private and public sector clients and offers expertise in areas as diverse as aerial surveillance and survey, passenger and cargo ad hoc and longterm charter, temporary and permanent aircraft modifications for project work and aerial spraying of pollution dispersants.

In addition to our plentiful office accommodation, we also have a 30,000 sq ft hangar, allowing plenty of room for our aircraft as well as housing our in-house engineering facility.

RVL Group also has a 20,000 sq ft private apron which enables us to offer complete aircraft handling and support services, including the supply of JET A1 & AVGAS 100LL aviation fuels from our own on-site bowsers.

## **Trusted Internationally**

RVL Group is a trusted name in aviation and its specialist services are utilised by a wide range of high profile private and public sector organisations.

**The expertise to  
deliver, the  
experience  
to adapt**

## **Safety**

Safety is our number one priority which is why we invest heavily in our Safety Management System and its support team. We have dedicated safety action groups reporting to our Review Board to ensure we are consistently operating safely and providing a duty of care to our customers and staff.

## **Operations**

Our Operations Department is manned 24 hours per day, seven days per week and provides round the clock support to all of our flight operations. From flight planning and logistics to client reporting and crew management, our Operations Officers ensure a constant flow of information is communicated to key departments within the business and to third parties such as Air Traffic Units across the country.

## **Engineering**

Under its Part 145 Engineering Approval, RVL Group is responsible for maintaining the entire fleet, ensuring that it receives the best possible care whilst minimising disruption to the client. Our team provides 24/7 cover to ensure all of our aircraft are thoroughly inspected and customers receive the best possible service.

## **Airworthiness**

Our Airworthiness team is responsible for managing RVL Group's Part M Continuing Airworthiness Approval and our entire aircraft portfolio. With expert planning and regulatory compliance, it provides fleet management support to a wide range of aircraft types and variants.

## **Administration**

From accounting to facilities management, our administration team ensures that the business runs smoothly all year round.

## **Ramp Services**

Keeping the aircraft moving on the ground requires highly skilled and trained support staff to ensure they receive fuel and push back 24/7. Our hangar accommodates all of RVL Group's East Midlands based aircraft and we regularly carry out in excess of 2,000 ground movements per month.

**A world of aviation  
services, providing  
first class flexibility  
& support**

## **Cargo & Charter**

Operating under our EASA AOC, Type A Operating Licence and Dangerous Goods Approval, we have availability for immediate ad hoc and contract cargo charter work. With experience operating throughout the UK, Europe, the Middle East and Africa, we are perfectly suited to dealing with rapid response flight requests.

Our F406 Caravan is capable of accepting industry standard pallets and has a payload of up to 1.5 tonnes. This is an aircraft perfectly suited to transporting mail, general cargo, automotive parts and even hazardous material under our Dangerous Goods Approval.

## **Aerial Surveillance**

RVL Group aircraft are capable of providing airborne platforms for a wide range of aerial surveillance equipment including high quality still and video photography, infra-red sensors, heat and movement detection, radar systems and LiDAR.

Having operated in a variety of configurations for high profile private and government organisations, we have a wide range of aerial surveillance experience and can offer aircraft perfectly tailored to meet your requirements.

## **Engineering Services**

Under its Part 145 and Part M engineering approvals, RVL Group maintains its own fleet, ensuring that the aircraft receive the best possible care and attention whilst minimising disruption to the client.

RVL Group also has over 30 years' experience managing a wide range of aircraft types and can offer any service tailored to your requirements in specialist areas including; continuing airworthiness management, technical record management, documentation storage, regulatory compliance, maintenance planning and oversight, arranging for maintenance, repair and parts overhaul, and battery & ELT Bay servicing.

## **Aircraft Management**

With our EASA AOC, Type A Operating Licence and 24/7 Operations Department we can provide full support services to any owner wishing to commercialise their aircraft.

## **Aircraft Handling Service**

RVL Group offers re-fuelling and ground handling to visiting aircraft at East Midlands Airport. With our 20,000 sq ft apron, which is fully covered by CCTV, we have plenty of space for aircraft parking and manoeuvring. We also supply both JETA1 & AVGAS 100LL 24/7, 365 days per year.
